

Vacancy – Student Assistant for the Projectteam

The Dutch Environmental Database is looking for a student assistant who wants to contribute to a future-proof construction sector. Thanks to your support, the right data and insights will be made available for reliable environmental calculations.

Stichting Dutch Environmental Database (NMD) manages the Dutch Environmental Database, the source of environmental data for construction products in the Netherlands. This data forms the basis for, among other things, the environmental performance calculation of buildings and civil engineering works. Our projectteam has a vacancy for a student assistant who wants to make a substantive contribution to the sustainability of the built environment.

What will you do?

As a student assistant, you will support the projects team in both substantive and organisational tasks. You will work on projects relating to the Assessment Method, category 3 data and other environmental declarations. This will give you the opportunity to gain experience with LCAs and sustainability issues in the construction sector.

Your tasks:

- Research and document substantive questions on LCAs and the Assessment Method
- Take minutes during internal technical meetings
- Support project work such as:
 - Tasks within category 3 projects (including data analyses, research, checks and scheduling meetings)
 - Contributing to the optimisation of core processes

What do we offer?

- An instructive role in a team working at the foundation of sustainable construction in the Netherlands
- Insight into the world of LCAs, environmental data and policy development
- Opportunities for advancement within Stichting NMD
- Flexible working days (minimum 2, maximum 4 days per week)
- A workplace in the centre of The Hague, easily accessible by public transport
- You will primarily work in the office; working from home is only possible in exceptional cases
- Working days are preferably Monday to Thursday

Nationale
MILIEUDATABASE

What do we ask of you?

- You are available for at least one year, 2 to 4 days per week
- You will work at our office in The Hague
- You have basic knowledge in the field of life cycle assessments
- Affinity with sustainability, environmental data or LCAs is an advantage

Interested?

Send a short motivation and your CV, for the attention of Nicoline Opbroek, to info@milieudatabase.nl.

Do you have questions? Feel free to contact us at +31 (0)70 – 307 29 29 or via info@milieudatabase.nl.
